

How to write (good) scientific papers in chemistry/biotechnology?

Prof. dr hab. inż. Andrzej Składanowski

Course description:

This lecture provides basic information about successfully preparing manuscripts for publication in scientific journals. During lectures several important issues associated with writing and publishing of good scientific papers will be discussed including:

1. Selection of journals
2. The structure of a good scientific/review paper
3. How to succeed during manuscript evaluation?
4. Is it worth publishing in highly-ranked scientific journals?

Some of the aspects related to presentation of papers are during scientific conferences will also be discussed. Second part is devoted to critical evaluation of exemplary titles, abstracts and papers (manuscripts) provided by a lecturer and attendees.
